1. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a slider having a slider section with a first medium facing surface, an element section with a second medium facing surface and a magnetic head, where the first medium facing surface has features for controlling the orientation of the slider while the medium is rotating, the slider and element sections being bonded to each other, where the first medium facing surface has a first surface closer to the element section, a second surface nearer to the air inflow end, and a border portion between the first and second surfaces, the first and second surfaces being slanted relative to each other to form a convex shape bent at the border portion, wherein the slider section is in contact with the recording medium regardless of whether the medium is rotating or at rest, and the first and second surfaces slant against the medium so that the element section and air inflow end are off the medium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
